Ring up sales. Fast. Easy.

The intuitive check-out interface requires minimal button touches, enabling cashiers to ring up sales fast and keep the lines short. Ringing up an item is as simple as scanning its bar code, or touching its button on a touch screen if it does not have a bar code. CRE is designed to require the least amount of touches necessary to ring up a customer. Quick tender keys make cash transactions fast, and closing out a sale to credit, gift or debit card is as simple as swiping the card—no buttons required.

- Fast, accurate checkout
- Touch screen invoicing
- Scan items quickly with bar code scanners
- Place a transaction on hold while it's in progress, recall at any future time
- Salesperson commissions tracking
- Item lookup by description

New customers. Repeat customers.

Good service and quality products are key components of generating new and repeat business, however, those two elements alone will not ensure success. Cash Register Express helps you answer the question of 'What next?' after selling to a customer. Solid marketing and a loyalty rewards program are proven methods of attracting new and existing customers into your store. The system puts several tools in your hands to help you accomplish this including automated tracking of loyalty plans and tools to market directly to your customers.

- Built-in customer tracking
- Record birthday and anniversary dates
- Record itemized purchase details of each customer
- Automatically tracks and gives rewards
- Birthday bonuses
- Ability to send informational newsletters, coupons, sales and new product announcements
- Print customer mailing labels with optional bar code
- Fast customer lookup with membership cards, last name, phone number
- Flexible customer loyalty plans to generate repeat business
- Accounts Receivable
- Frequent visitor discounts
- Ability to send mass e-mails
- Customer loyalty cards tie to customer accounts that track loyalty activity
- Scan customer license to auto-populate customer record

Track inventory, reduce theft.

Accurate and robust inventory control is a key component of a retail store's profit margins and overall success. The inventory tracking capabilities within Cash Register Express detail which products are selling, what needs to be reordered and identifies items that have been stolen or are otherwise missing. The integrated purchasing functionality is used to track vendor lists, manage item costs and generate and receive purchase orders. Stock can be counted or received away from the register using the integrated Pocket Inventory software on a handheld computer.

- Purchase orders
- Actual versus Theoretical Inventory Counts
- Discrepancy reports
- Track serial numbers
- Detailed inventory reports
- Late, rented videos, videos in store
- Track item costs and profit margins
- Low stock alerts
- Add items "on-the-fly," even during a sale
- Size/color apparel matrix
- Group pricing, mix & match
- Track by case or individual
- Fast Lookups by Barcode, description
- Detailed sales history of each product

Control your employees and secure your business.

Employee theft is one of the leading causes of retail shrink, caused by a combination of theft of cash and inventory, as well as unwarranted discounts. Cash Register Express includes multiple theft prevention features that introduce accountability to your employees. System functions such as discounts, no-sales, voids, and price changes can be accessed or restricted based on an employee's unique login ID or job code. Various reports can be generated on this activity to identify potential theft or wrongdoing. Strict cash control features can be used to identify cash discrepancies down to the shift or the cashier. A camera security system can be connected to your point of sale system to further enhance the accountability of your employees and security of your store.

- Employee security with unique IDs, password protection and option secure login card
- Configure Job Codes for different roles in the store
- Job codes and security roles
- Labor scheduler
- Salesperson tracking
- Exception tracking to spot suspicious activity
- Integration with security camera DVR systems, shows transactions live on camera screen
- Cash control features to force cash drops throughout the day
- Time clock with breaks
- Hours & Wages reports
- Management reports
- Commissions reports
- Increased accountability
- Sales, voids, no-sales and other activity displayed on security monitors

Steps to ring up a transaction

1. Login cashier with unique ID

2. Scan in items to add them to the order

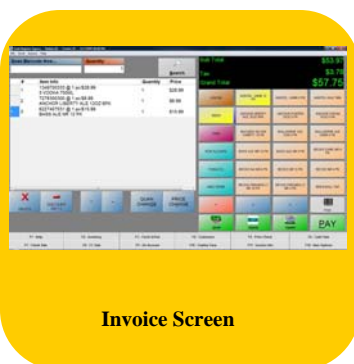

3. Touch in items that have no bar code

4. Touch pay button, enter amount tendered or swipe card

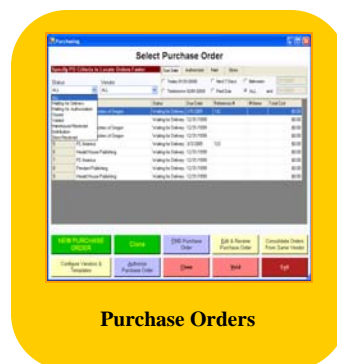

5. Receipt prints, change displayed, POS ready for next transaction

EMPLOYEE MANAGEMENT AND LABOR SCHEDULING

Labor is typically the largest expense in a retail store outside the cost of the products being sold. Cash Register Express has integrated time-clock and labor scheduling functionality to help you manage staffing and reduce labor costs.

- All store employees can clock in and clock out, as well as check out and in for paid or unpaid breaks
- Hours and Wages reports summarize employee earnings and commissions
- Integrated labor scheduler makes it easier to manage shifts and ensure a sufficient but not excessive amount of labor is on hand
- Create & print labor schedules including hours, breaks and job code being worked
- Punctuality controls ensure timely arrival and also prevent clock-ins from employees not scheduled to work
